VERAE TIME × ZAPIER

Zapier-only access plane

site/packages/verae-access-zapier/README.md

verae-access-zapier

Zapier is one access plane, not the only one. This process is the Zapier HTTPS front door: timestamp/wait/hash into middleware. No customer portal, no admin, no leaf.

Forgejo: <https://git.georgelambert.org/marchon/verae-access-zapier>

Zapier cloud never opens NATS. This process may request `verae.access.authz.check` for `verae.zapier.jobs.watch` and `verae.billing.usage.recorded` only.

Port `:3024`.
