VERAE TIME × ZAPIER

ROUTING

site/packages/verae-nats-process/ROUTING.md

Address row (copy into overview INDEX and docs-master)

Address	Kind	Queue group	Publisher	Subscriber	Body
verae.example.process.in	JetStream work	example-process	middleware or peer	this worker	{ correlationId payload, traceId }
verae.example.process.out	events	—	this worker	interested peers	handle() result
verae.example.process.reply.<id>	reply	—	this worker	original requester	handle() result

Rename `example` / `process` before production. Do not subscribe from Zapier.
