VERAE TIME × ZAPIER

verae-staff-session

site/packages/verae-staff-session/README.md

verae-staff-session

Shared cookie login for CS / sales / accounting / access-staff HTML.

Forgejo: <https://git.georgelambert.org/marchon/verae-staff-session>

Port :3027. Set `STAFF_AUTH=1` on the department servers and `STAFF_SESSION_URL=http://127.0.0.1:3027`. Cookie host is the browser host (ports share `127.0.0.1`). JSON APIs stay open unless you also send `x-staff-key`.

Default key: `STAFF_KEY` or `ADMIN_KEY` or `admin-dev-key`.

Multiple hostnames

Cookies are host-scoped. On one operator box (`127.0.0.1`) that is enough. For several DNS names, put one reverse proxy in front and set `STAFF_COOKIE_DOMAIN`:

```
server {
    server_name staff.example.com;
    location /session/ { proxy_pass http://127.0.0.1:3027; }
    location /cs/      { proxy_pass http://127.0.0.1:3011; }
    location /sales/   { proxy_pass http://127.0.0.1:3012; }
    location /acct/    { proxy_pass http://127.0.0.1:3013; }
    location /staff/   { proxy_pass http://127.0.0.1:3025; }
}
```

```
STAFF_COOKIE_DOMAIN=.example.com
STAFF_COOKIE_SECURE=1
STAFF_SESSION_URL=https://staff.example.com/session
STAFF_AUTH=1
```
