VERAE TIME × ZAPIER

QuickBooks / accounting export

site/packages/zappier-accounting-export/README.md

zappier-accounting-export

Accounting-department export of **invoices, billing, and payment history** to **QuickBooks IIF** and generic CSV (also usable in other ledgers).

Forgejo: <https://git.georgelambert.org/marchon/zappier-accounting-export>

Catalog: <https://zapier.georgelambert.org/packages/zappier-accounting-export/README.pdf>

Reads issued/paid invoices from zappier-edge (`ZAPIER_ADMIN_URL`). Customer statements (credits, balances, usage, payments) come from NATS `verae.billing.statement.get` .

Staff UI: <http://127.0.0.1:3013/>

```
PORT=3013 NATS_URL=nats://127.0.0.1:4222 node src/server.js
curl http://127.0.0.1:3013/review/cust_1
curl 'http://127.0.0.1:3013/export/quickbooks.iif?period=2026-07' -o zappier.iif
curl 'http://127.0.0.1:3013/export/accounting.csv?period=2026-07' -o zappier.csv
```

Import the IIF in QuickBooks Desktop: **File** → **Utilities** → **Import** → **IIF**. The CSV is a flat invoice register for other systems.

History is the invoice list on zappier-edge (draft / issued / paid) plus CS credit ledger and portal prepaid reloads.
